# TenCate Polyfelt® Accorder®

High performance flexible three-dimensional structure

The ideal solution for **aggregate surfaces**,  
Stable and water-permeable. Suitable for all vehicles.

**No more water runoff, puddles or ruts.**  
Driveways, patios, parking lots, garage entrances,  
Car Parks, parks and gardens, golf courses,  
Driveways and low-traffic roads...  
**TenCate Polyfelt® Accorder® can be immediately trafficked.**

## PRODUCT BENEFITS

- **Flexible** and can be installed on uneven ground and slopes **up to 15 degrees**.
- **Continuity of material between the walls and the bottom of the cell:** A high strength product offering improved containment and a reduction in fill materials.
- Suitable and can be **trafficked immediately** with Trucks, Cars, Wheelbarrows, Wheelchairs, Bikes and Motorbikes ...

- TenCate Polyfelt® Accorder®, soil stabilization solution, provides a **draining surface**.
- + **Significantly reduces rutting.**
- + **All types of filling materials** can be used: sand, gravel, aggregates, expanded clay balls, etc...
- + **Large dimensions** covered at one time.

## FEATURES

Environmentally friendly sustainable solution

## Easy Installation

- It's light weight and allows a quick installation with **no need for any specialist tools**.
- **It can be walked on before filling** without damaging the product. The cells return to their original shape.
- **Immediately passable by public works machinery.**

## Specification

- High performance cellular structure,
- Significantly reduces rutting of the aggregate surface
- A flexible structure that adapts to the irregular surface of the ground, can be installed in curves and on slopes
- Lightweight, easy to handle, transport, cut and quick to install
- High resistance to traffic
- **Durability 50 years with compliance with installation instructions**

## Format & Packaging

- Folded panel = 5 x 1 m  
Unfolded panel = approx. 4.4 x 20 m\*
- Foldable panel, easy to transport, If folded can be transported by car
- Width of the panel about 4.40 m for a surface area of 90 to 100 m<sup>2</sup> in function of stretching during the break
